High on performance and versatility, Elan Plus is the ultimate inline glass system designed to meet the uncompromised needs of exclusive applications where the washroom is a vital part of the overall building user's experience.

Elan Plus is the ideal system for exclusive multi-use applications combining washroom, showering and changing in a wet room environment. Architectural in form and scale, Elan Plus is engineered to work in many different configurations and features striking fixings and internal headrail profile, fully compatible with a range of panel options in 15.52mm laminated and toughened glass.

With attractive anodised corrosion resistant fittings and rebated door design for added privacy, Elan Plus provides an elegant approach to wetroom design.
