

# Broadgate Quarter

**Bepoke premium toilet cubicles, mirror housing unit and vanity units for prominent London office space.**

9 Appold Street forms part of the Broadgate Quarter complex, a modern collection of office space in a prominent London location with stunning views across the city. Petal delivered a high specification bespoke washroom solution over 3 floors of this building with impressive results.

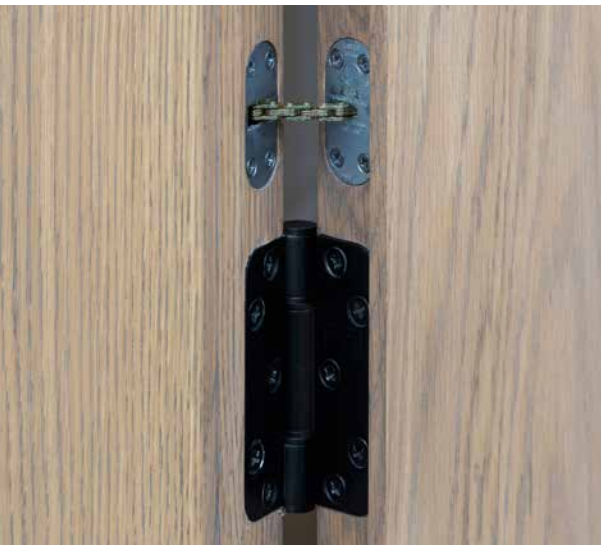

A fully customised approach was utilised throughout the project, giving the client a unique finish, including a mirror housing unit which helps create a clutter free area and a streamlined aesthetic throughout.

An Esteem bespoke cubicle system was installed throughout the project, providing floor-to-ceiling height in American Crown Oak real wood veneer, coupled with a soft closing door mechanism and incorporating black PVD and powder coated ironmongery.

All items were customised including a Hi-Macs solid surface Chic Concrete finish trough vanity unit complete with cupboards and magnetic doors. Striking black hardware completed a truly stunning project.
