

City Quays 3

High quality commercial washroom fit out for 250,000 square feet Grade A Belfast office accommodation.

Petal’s mirror housing units with hinged access system and attractive overhead lighting feature provided an impressive backdrop to the washrooms of this Grade A Commercial Office fit-out project in Belfast’s Harbour area.

Line Plus toilet cubicles and P300 APS paneling to the rear of cubicles and urinals were specified in a dark woodgrain finish HPL which provides an effective contrast to the white walls and light-coloured flooring throughout.

With additional height, Line Plus cubicles provide enhanced privacy levels over standard height doors, with a full height of over 2.4 metres for improved discretion. With a flush fronted finish, rebated doors and set back pilaster feet, Line Plus creates a premium feel for this project whilst maintaining a mid-range price level.

The standout feature of this installation is the inclusion of Petal’s mirror housing units with solid surface troughs included as the vanity choice. The integral upstand helps create a seamless transition from vanity to the overhead mirror housing unit.
