Cubicle + Washroom Systems

SPORTS
& LEISURE

DESIGN THAT LASTS

When it comes to designing washroom systems for leisure environments, performance is as important to us as it is to any sportsperson.

Our Sports & Leisure range is specifically designed to withstand the challenging conditions of a hot damp environment, with hard wearing systems and moisture resistant materials as standard. We put our systems through more rigorous tests than most other manufacturers and guarantee our products for up to ten years.

That's why we can say with confidence '**Design that Lasts.**'

PETAL

Based on more than 40 years of experience we have perfected the best way to manufacture & install washrooms for education, with hundreds of nurseries, schools, colleges and universities across the UK and Ireland all in our Supply & Fit portfolio.

Our values remain the same. We are ready to go the extra mile to make it happen within your budget and timescale.

Thank you for considering Petal as your partner for washrooms.

Patrick Monaghan
Managing Director

High Performance Solutions

Our experience in the fitout of major sports, recreation and leisure facilities places us in a prime position to feature in your project's team selection.

Our leisure washroom and changing cubicles, benches and lockers have been installed with performance and durability in mind. With a range of colours and materials to choose from and our years of experience in design, manufacture and fit-out at your disposal, you can be sure that Petal has the perfect solution for any sports & leisure project.

Why Petal?

Tamper proof fixings

All school washrooms, cubicle systems, changing room benches and toilet partitions adopt securely engineered dowelled fixings for superior tamper proof performance which avoids the need for ugly visible through panel fixings.

Outstanding strength

Petal's cubicle system design, which utilises either a floor fitted pilaster foot or a continuous leg, ensures exceptional strength compared to alternative systems which typically use pedestal legs and patch fittings.

Continuous wall channel

Our cubicle systems are typically fixed to the wall in a continuous aluminium channel which gives stability not seen in alternative cubicle systems which use single point cleat fixings.

Quality fittings

Our fittings are tried and tested over many years to ensure long service life and to enhance user experience.

Guaranteed Quality

Designed, manufactured and installed by one team

Installed by our own team of trained and skilled fitters.
100% commitment to delivering quality projects.

Petal does not take its brand statement Design That Lasts lightly.

We issue a Product Warranty certificate with each of our Compact Grade Laminate cubicles, demonstrating our full commitment to the quality and durability of our products.

This ten year warranty is confirmation of our dedication to supplying washroom solutions which have structural integrity and are fit for purpose.

10 Year Warranty

PETAL
Cubicle + Washroom Systems

Warranty Certificate

This is to certify that the cubicle system and installation supplied by Petal for this education washroom is guaranteed to last without failure for 10 years.

Materials

Design

Advances in materials and choice of sanitary ware means that the options for vanities have never been greater. With Petal's advice and guidance, you can choose carefully to ensure that both the aesthetic appeal and the functionality of your washroom will be achieved.

Vanities

Duct & Access
Panels

Panel Options

The Petal duct panel system is highly versatile and can accommodate all wall and ceiling configurations.

Our technical department will translate your washroom plans into a detailed duct panel system which will enhance any washroom environment. Petal offers a fully bespoke service for duct panels so every system is produced in our workshops for efficient trouble-free installation on-site by our expert fitting teams.

Available Options

P100-HPL Square Edge
P300-CGL Polished Radius
P400-Glass-Backpainted

Panel Overview

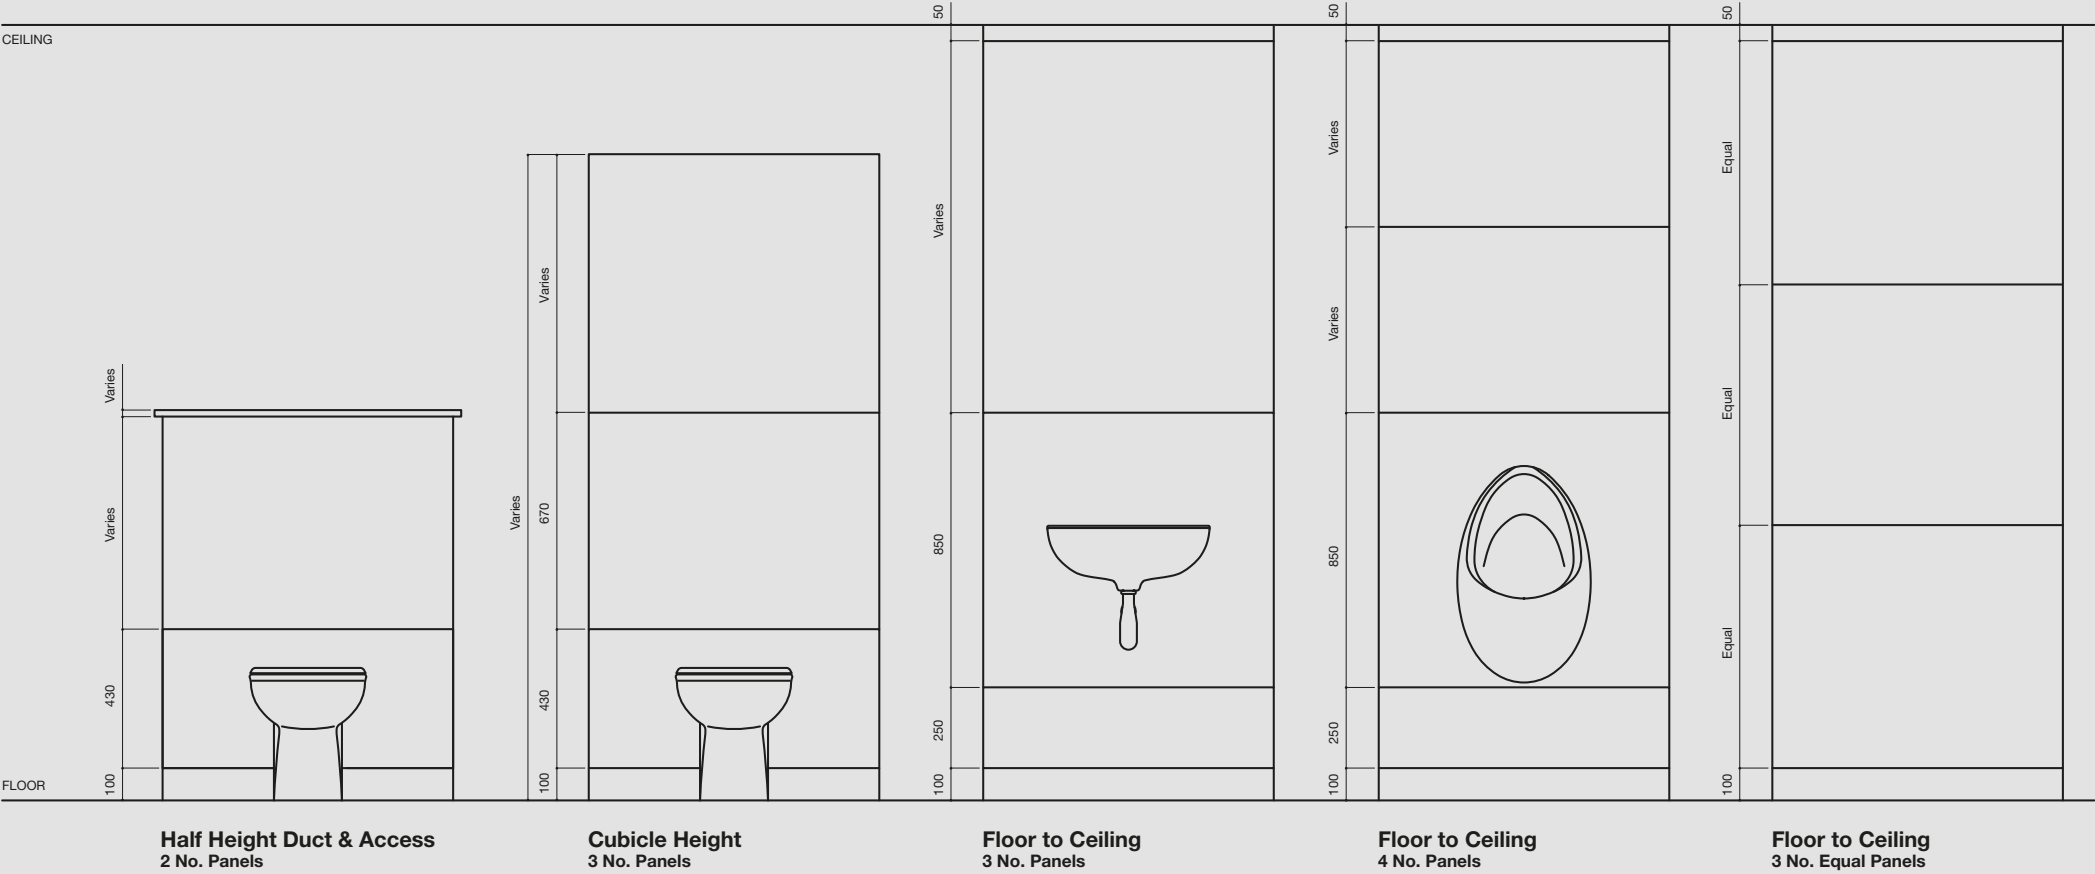

Robust factory assembled steel sub-frames form the support for the specified flash gap and face panel materials. This results in an extremely versatile solution which can accommodate the specific plumbing layout of each project.

A variety of practical panel fixing methods are available and will be discussed when the sanitary ware and plumbing choices are confirmed with details of any special requirements such as hinged or locked access etc.

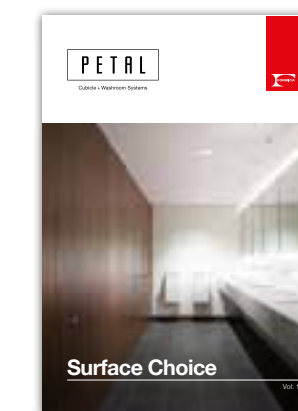

Aesthetically, a wide range of panel materials, laminate finishes, panel and flash gap combinations are available and particular suitability can be discussed with our technical team.

Sample Service

Our Sales team are equipped with a full range of working samples for client approval and are happy to arrange a viewing at a location to suit you. We also have a full range of laminate colour samples available on request.

The latest Petal colour collections contain a vast array of solid shade and wood grain options. Our Surface Choice volumes 1 and 2 are available via our website, with chip cards also available on request. Larger A5 laminate samples are also available on request.
